URBAN SOLID TOP VANITIES

Solid Surface Tops

Urban Solid Top vanities include a Solid Surface top. Tap and waste holes can easily be drilled with holesaws supplied, or top can be cut out for inset basins on site by installer using a jigsaw.

Basin Options & Placement

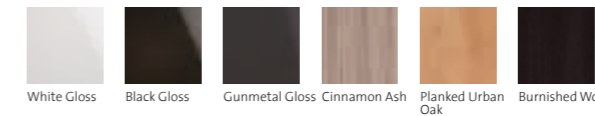

Urban Solid Top vanities exclude basins which need to be purchased separately - refer to page 37. Basins need to be mounted above the centre of the drawer/s e.g. Urban Solid Top 1800 vanities could have 2 basins above each drawer, or 1 basin offset above the left or right drawer/s.

**High Gloss Acrylic Board:**

Our High Gloss Acrylic Boards offer a glass-like mirror finish without the imperfections and reflection distortions associated with other finishes such as high gloss lacquer or gloss coatings. It is also easy to clean, and is less prone to smudges and marks from fingerprints.

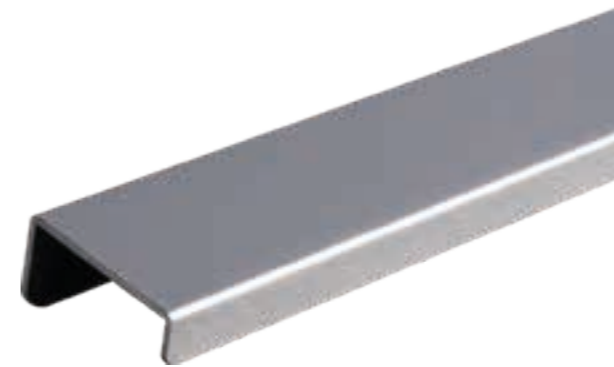

The Urban range is available in three of New Zealand's most popular High Gloss Acrylic Board finishes, all which are often mistaken for a perfect paint lacquer.

**New Zealand Melamine:**

Moisture Resistant MDF Melamine is an environmentally friendly choice that offers a tough, scratch resistant surface, guaranteed colour evenness and consistent grain.

**Laminex:**

Melteca colours are available in a range of finishes. By adding a dimension of depth, textures create not only a visual but also a tactile sensation - essential for perfect style. The Pure grain finish, creates a strong texture which not only looks like natural wood but feels like it too.

Chrome

Brushed Nickel

White

Black

Urban vanities come in four different handle finish options. **Please specify when ordering.**

Handles can also be purchased separately for use on other vanities or bathroom furniture.

WELS Rating 3★  
Flow Rate - 7 L/min & 8 L/min (Overhead)

**VALVE TECHNOLOGY URBAN AND FORM**

The Urban Multipressure shower mixer has integrated isolator/balancing valves for unequal water pressure systems, and an incorporated wall bracket for easy fixing. This valve will work across multiple water systems, Unequal, Equal High & Equal Low. All Urban & Edge faucets are supplied with large bore hot water hoses to maximise hot water flow if used on an unequal pressure system, an Aerator plus Flow Straightener to suit low or high pressure water systems, and an adjustable flow control valve that when fitted to the Cold Water supply increases the ability to control the water flow to optimise the faucets performance.

**Pressure Rating**

Mains Pressure Equal = Max 500KPA – Min 150KPA  
Low/Unequal = Max Cold 500KPA – Min 35KPA

**Shower Mixer Flow Rates**

Mains Pressure = 8.5L/m (matched with a WELS 3 Star shower)  
Low/Unequal = 7L/m Urban & 8.5L/m Edge (matched with a WELS 3 Star shower)

**EDGE, FORM, AND URBAN SHOWER BATH DIVERter MIXER**

All the features of the IVT Multipressure shower mixer including being able to be used in Mains, Low, and Unequal pressure systems, combined with a Diverter Button that allows you to switch from your shower to your spout when used in a shower over bath situation, or can be used to control the function of a slide shower and an overhead shower in a dual shower installation.

**Pressure Rating**

Mains Pressure Equal = Max 500KPA – Min 150KPA  
Low/Unequal = Max Cold 500KPA – Min 35KPA

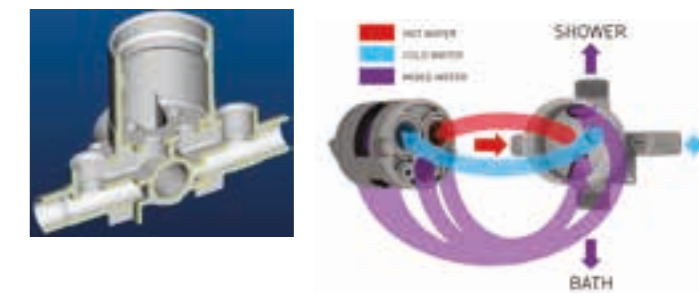

**Shower/Bath Mixer Flow Rates**

Shower Mains Pressure = 8.5L/m (matched with a WELS 3 Star shower)  
Bath 50L/m (minimum 350KPA required to achieve maximum flow rate)  
Shower Low/Unequal = 8.5L/m (matched with a WELS 3 Star shower)  
Bath = 22L/m

**VALVE TECHNOLOGY EDGE**

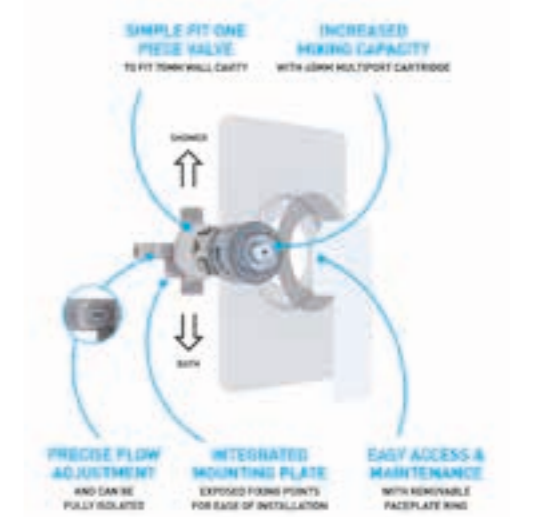

IVT Multipressure shower mixer includes all of the features of the Urban shower mixer and turbocharges them!  
The 45mm Multiport Sedal Cartridge, and the specifically designed for New Zealand water systems Edge body, combine to produce maximum flow rate in a low and/or unequal pressure water system situation. The one piece valve has been designed with no additional parts or alterations required. The plumber simply fixes the valve securely using the incorporated mounting plate, attaches the hot and cold water supply and if necessary adjusts the integrated flow control valves to suit your water system. Using the large faceplate provides easy access to the isolator/control valves if ever you need to re-adjust the water flow (ideal if you have a low pressure system but are changing to mains pressure, no other alteration would be required) without compromising any water seal integrity. As an option if you want a more minimalist look, a smaller faceplate is included (note that this may compromise access to fully remove the valve from the wall cavity if ever required), creating a more refined and simple style.

An additional feature of the Edge shower mixer is the bath outlet. Using the valve with a bench or wall mounted bath spout (must be used as a shower or bath mixer, not both at once) the plumber can cap off the shower outlet and the large volume of water the IVT allows to pass through can deliver as much as 50 litres per minute, filling your bath in no time.

**Multi Pressure Shower Mixer**

An easy fit one piece shower valve with Intelligent Valve Technology (IVT), designed in New Zealand to perform better across multiple water pressures.

**URBAN** FLOOR STANDING BATH FILLER

(7) 719128

Made from solid brass construction. Suitable for mains pressure. Comes with hand piece. Chrome. 35 year domestic warranty.

Adesso (or their approved retailer) reserve the right to assess, repair, replace or service any warranty claims as they see fit.

Adesso will endeavour to repair or replace the faulty product(s), subject to investigation and the following requirements;

- warranty claim must be submitted within the warranty period and Adesso (or their approved retailer) must be notified in writing, within ninety (90) days of the issue first appearing
- proof of purchase is required
- product(s) must be installed by the relevant tradesperson and maintained in accordance with the manufacturer's instruction.
- the product(s) are to be used for normal, domestic use only
- This warranty DOES NOT APPLY if any product(s) fault results from;
  - improper use, improper installation
  - where damage is caused by normal wear and tear, the water pressure is outside the recommended levels, where the hot water temperature exceeds 55°C

Or if any of the following are not observed;

- Applicable Health Act.
- any regulation or other standards which governs the water supply and sewerage plumbing requirements for installation in a particular area or location.

The warranty is limited to the replacement of defective parts only.

Excluded from the warranty;

- labour charges and/or damage incurred during incorrect installation, repair or consequential damage, or otherwise suffered or incurred by any such person
- any defect or injury caused by or resulting from misuse, abuse or neglect, accidental damage, improper installation or other alterations or modifications which affect the reliability or performance of the item, not attributed to faulty manufacture.
